

TuesdayAfternoon Media Inc.
550 Queen St. E Suite 202, Toronto, ON M5A 1V2

Front End Web Developer

WHO WE ARE

TuesdayAfternoon Media Inc. (TAM) is a multidisciplinary design firm who specializes in tailored learning solutions designed to drive transformation. We empower learners to perform to their highest potential by creating effective, original, and results-driven training solutions. We believe in partnering and relationships, and are best known for our thoughtful and consultative approach. We thrive on creative innovation and focus on what matters most to our partners and clients.

RESPONSIBILITIES

What does a Front End Web Developer do at TAM?

The Front End Web Developer provides direct support for our team of Instructional Designers and Media Developers to produce best-in-class training and education solutions using a variety of web tools.

Make an impact in the following areas:

- Support the creation of innovative learning solutions that are flexible, aligned with clients' needs, and consistent with TAM's commitment to quality.
- Maintain up-to-date knowledge of trends and technology in the fields of web development and learning methodology in order to innovate and elevate TAM's learning solutions.
- Partner and collaborate with team members and clients in support of initiatives.
- Be an active contributor to a positive, innovative, and collaborative work environment.
- Contribute to the evolution of TAM's methods and practices, driving efficiencies and effectiveness and supporting other team members through adoption.

The soft skills you'll need at TAM:

- Strong team player who communicates clearly and demonstrates patience and humour while working with others
- Strong analytical and organizational skills, with a passion for continuous learning
- A confident self-starter with a track record for taking initiative and working towards continuous improvement
- Ability to multi-task in a fast-paced environment and prioritize projects using sound judgment and time-management skills

QUALIFICATIONS

Showcase your skills in the following areas:

Our current front end product stack includes: JavaScript, Vue.js (or other comparable frameworks), jQuery, CSS, HTML, Bootstrap, etc.

Must have:

- Progressive experience in a similar role
- Experience with software version control systems (Git, Subversion, etc.)
- Capability or experience working with front-end languages such as JavaScript, Vue.js (or other comparable frameworks), jQuery, CSS, HTML, and Bootstrap is a requirement.

Nice to have:

- Related post-secondary education and professional accreditations or equivalent experience
- Intermediate to advanced skill with Linux/*nix command line interface
- Background in eLearning, knowledge of industry standards (SCORM, AICC, xAPI), and experience working with eLearning products in an LMS context
- Interest or experience in Machine Learning and Gamification of Learning: These are areas of active investigation for us so we're looking for individuals who can help drive innovation in these fields.

*Please send your resume and cover letter to careers@tuesdayafternoon.net with **Front End Web Developer** in the subject line. We thank you for your submissions. Only those selected for consideration will be contacted.*
