550 Queen St. E Suite 202, Toronto, ON M5A 1V2

Senior Web Developer

WHO WE ARE

TuesdayAfternoon Media Inc. (TAM) is a multidisciplinary design firm who specializes in tailored learning solutions designed to drive transformation. We empower learners to perform to their highest potential by creating effective, original, and results-driven training solutions. We believe in partnering and relationships, and are best known for our thoughtful and consultative approach. We thrive on creative innovation and focus on what matters most to our partners and clients.

RESPONSIBILITIES

What does a Senior Web Developer do at TAM?

The Senior Web Developer provides direct support for our front-end web developers, leads through experience, and guides innovation to produce best-in-class training solutions using a variety of web tools. This role works alongside our front-end web developers, media designers, and instructional designers.

Make an impact in the following areas:

- Support the creation of innovative learning solutions that are flexible, aligned to clients' needs, and consistent with TAM's commitment to quality.
- Maintain up-to-date knowledge on trends and technology in the fields of web development and learning methodology in order to innovate and elevate TAM's learning solutions.
- Partner and collaborate with team members and clients in support of initiatives.
- Be an active contributor to a positive, innovative, and collaborative work environment.
- Contribute to the evolution of TAM's methods and practices, driving efficiencies and effectiveness and supporting other team members through adoption.

The soft skills you'll need at TAM:

- Collaborate with team members, partners, and clients while working in a matrix environment.
- Employ functional innovation and practical problem-solving in support of client needs.
- Contribute to the development of others and implementation ideas using systematic organizational change management practices.

QUALIFICATIONS

Showcase your skills in the following areas:

Our current product stack includes PHP (specifically the Laravel framework) with MySQL Database. A strong working knowledge of PHP is required, as well as the front-end skill set in JavaScript, jQuery, CSS, HTML, Bootstrap, etc.

Must have:

- 5+ years of progressive experience in a similar role within a learning, human resources or organizational development field
- Related post-secondary education and professional accreditations
- Strong analytical and organizational skills, with a passion for continuous learning
- A confident self-starter with a track record for taking initiative and working towards continuous improvement
- Strong team player who communicates clearly and demonstrates patience and humour while working with others
- Ability to multi-task in a fast-paced environment and prioritize projects using sound judgment and time-management skills

Nice to have:

- Interest or experience in Machine Learning and Gamification of Learning: These are areas of active investigation for us so we're looking for individuals who can help drive innovation in these fields.

*Please send your resume and cover letter to careers@tuesdayafternoon.net with **Sr. Web Developer** in the subject line. We thank you for your submissions. Only those selected for consideration will be contacted.*
